

ECONOMICS (Tertiary)

The study of Economics provides students with a thorough understanding of their roles, as individual decision makers, within our economic system. Students are encouraged to participate in informed discussion and to call on real-life experiences, since our daily activities and discussion are often related to the performance of economic functions.

“Learning Economics at Narrabundah College enabled me to understand its impact on the economy. It completely changed the way I viewed the world and inspired me to keep learning economics at uni and beyond.” – Anuja PIYATILAKE Economics Student, CLASS of 2012

“My current teacher is so passionate about what he teaches and passing his knowledge onto us students, which makes it so easy to engage and learn” – Talis TEBECIS ECONOMICS Student, CLASS of 2014

Curriculum Enrichment Activities and Opportunities

We organise a wide range of activities and provide students opportunities to connect what they study in the classroom to the real world and explore the potential career pathways.

- Guest Speakers. We organise guest speakers throughout 2 years according to the availability of the speakers. For examples:
 - Prominent Australian economists
 - Speakers from Australian Bureau of Statistics
 - Speakers from UBS
